PROFESSIONAL SUMMARY

PhD organic/materials chemist with 6+ years in synthetic chemistry, purification, analytical characterization, and DOE-guided process development. Builds reproducible process windows and data packages connecting reaction/process variables to purity, stability, scale-up, and technical decision-making.

CORE COMPETENCIES

Chemical Process Development

Synthetic Organic Chemistry

Route & Reaction Optimization

Purification & Characterization

NMR / MS / IR / Chromatography

DOE/SPC

Scale-Up Documentation

Cross-Functional CMC Collaboration

WORK EXPERIENCE

University of Colorado Boulder

July 2025 - Present

Postdoctoral Researcher

- Lead DOE-guided chemical process-development experiments for bio-based polymer systems, defining process windows, analytical readouts, and reproducible scale-up specifications.
- Translate process variables, FT-IR/thermal/spectroscopic data, and material-quality outcomes into technical recommendations, SOP-ready procedures, and repeatable specifications.

University of Colorado Boulder

July 2021 - July 2025

Graduate Researcher

- Designed, synthesized, purified, and characterized 15+ organic electrochromic material variants, connecting molecular structure, purity, stability, and performance with NMR, GPC, MS, FT-IR, UV-Vis-NIR, TGA/DSC, and electrochemistry.
- Diagnosed degradation and failure modes through hypothesis-driven experiments, analytical comparisons, and structured datasets supporting reaction/process iteration.

Georgia Institute of Technology

Aug 2019 - July 2021

Graduate Researcher

- Co-led AFOSR-funded process development for molecular thin-film coatings, optimizing surface preparation and CVD conditions to improve reproducibility and optical/material performance.
- Connected processing conditions with film morphology and device behavior through spectroscopy, thin-film characterization, and iterative experimental design.

ETH Zurich

May 2017 - July 2017

Research Assistant

- Optimized polymer thin-film deposition under flow using DOE strategies and in-situ QCM-D monitoring to quantify growth kinetics and process controls.

University of Colorado Boulder

2021 - 2025

Laboratory Operations Manager

- Managed characterization/process-development lab operations for a 15-member group; implemented calibration, SOP, and safety systems that improved instrument uptime by 30%.

Teaching Assistant, Organic Chemistry I & Lab

- Mentored 120+ undergraduates; developed supplemental materials improving exam performance by 15%.

KEY PROJECTS**DOE-Guided Polymer Process Development** Current

Built experimental process windows, analytical readouts, and reproducible specifications for bio-based polymer scale-up.

DOE, SPC, FT-IR, thermal analysis, process variables, SOPs

Organic Synthesis and Analytical Characterization Chemistry of Materials 2025

Synthesized and purified molecular variants, then used multi-technique analytical data to connect structure, purity, stability, and performance.

Organic synthesis, NMR, MS, GPC, FT-IR, UV-Vis-NIR, CV

Process-Controlled Thin-Film Coatings DoD Funded

Developed CVD/surface-preparation strategies for molecular coatings and translated process conditions into reproducible material outputs.

CVD, QCM-D, surface preparation, process optimization

EDUCATION**Ph.D. in Chemistry - University of Colorado Boulder**

2025

Dissertation: Modular Design and Electrochemical Properties of Xanthene-Based Electrochromic Materials

Advisor: Prof. Seth Marder

(Transferred from Georgia Institute of Technology)

B.S. (Research), Major: Chemistry; Minor: Materials Science - Indian Institute of Science (IISc)

2019

INSPIRE Scholarship for Higher Education (Top 1% nationally)

CERTIFICATIONS

Statistical Process Control (SPC) - Coursera, 2026

TECHNICAL SKILLS

Process & Reaction Development: DOE, process optimization, route/reaction analysis, scale-up specifications, reproducibility studies, SOPs, technical reports

Analytical Characterization: NMR, LC-MS exposure, GC-MS, GPC/SEC, FT-IR, UV-Vis-NIR, TGA, DSC, QCM-D, cyclic voltammetry, chromatography-adjacent workflows

Chemistry: Organic synthesis, purification, small-molecule materials, polymers, structure-property analysis, reaction mechanism reasoning

Data & Documentation: SPC, Excel, Python/basic data analysis, JMP/basic, electronic/structured lab records, publication-quality scientific writing

Materials & Scale-Up: Bio-based polymers, electrochromic molecules, thin films, CVD coatings, stability/degradation analysis
