PROFESSIONAL SUMMARY

PhD chemist/materials scientist with 6+ years in thin-film process development, DOE/SPC, optical/spectroscopic characterization, and materials failure analysis. Brings CVD/PVD-adjacent coating experience, process-window design, and root-cause troubleshooting to solar-cell thin-film manufacturing and reliability problems.

CORE COMPETENCIES

Thin-Film Process Development | CVD / PVD-Adjacent Coatings | DOE / SPC | Defect & Root-Cause Analysis | Optical Material Quality | Reliability Testing | Scale-Up Specifications | Technical Design Reviews

WORK EXPERIENCE

University of Colorado Boulder

July 2025 - Present

Postdoctoral Researcher

- Lead DOE-guided process-development experiments for bio-based polymer systems, defining material-quality readouts, process windows, reproducibility criteria, and scale-up specifications.
- Translate FT-IR, thermal-analysis, spectroscopy, and process data into SOP-ready procedures and technical recommendations for repeatable execution.

University of Colorado Boulder

July 2021 - July 2025

Graduate Researcher

- Assessed reliability and degradation failure modes across 15+ functional material variants using spectroscopy, electrochemistry, thermal analysis, NMR/GPC, and MS-informed characterization.
- Built process-property datasets connecting purity, stability, optical response, and performance to experimental conditions, anomalous results, and material-design recommendations.

Georgia Institute of Technology

Aug 2019 - July 2021

Graduate Researcher

- Co-led AFOSR-funded molecular thin-film coating process development, optimizing CVD/surface-preparation conditions to improve reproducibility, morphology, interface quality, and optical/material performance.

ETH Zurich

May 2017 - July 2017

Research Assistant

- Developed polymer thin-film deposition under flow using DOE strategies and in-situ QCM-D monitoring to quantify growth kinetics and coating reproducibility.

University of Colorado Boulder

2021 - 2025

Laboratory Operations Manager

- Managed characterization/process-development lab operations for a 15-member group; implemented calibration, SOP, safety, and equipment-tracking systems that improved instrument uptime by 30% and strengthened data quality.

Georgia Tech

2019-2021

Teaching Assistant, Organic Chemistry I & Lab

- Mentored 120+ undergraduates; developed supplemental materials improving exam performance by 15%.

KEY PROJECTS

Thin-Film Coating Process Development DoD Funded

Established process-property relationships for CVD/surface-preparation workflows and reproducible high-performance coating conditions.

CVD, QCM-D, surface prep, optical characterization, DOE

Reliability and Failure-Mode Study Chemistry of Materials 2025

Mapped degradation, instability, and performance failure modes across functional material variants using orthogonal characterization and stress-test logic.

FT-IR, UV-Vis-NIR, CV, TGA/DSC, NMR, GPC, MS

Process-Controlled Polymer Scale-Up Current

Defined DOE-guided process windows, analytical readouts, reproducibility criteria, and SOP-ready quality specifications for polymer scale-up.

DOE, SPC, FT-IR, thermal analysis, process documentation

EDUCATION

Ph.D. in Chemistry - University of Colorado Boulder 2025

Dissertation: Modular Design and Electrochemical Properties of Xanthene-Based Electrochromic Materials
Advisor: Prof. Seth Marder
(Transferred from Georgia Institute of Technology)

B.S. (Research), Major: Chemistry; Minor: Materials Science - Indian Institute of Science (IISc) 2019

INSPIRE Scholarship for Higher Education (Top 1% nationally)

CERTIFICATIONS

Statistical Process Control (SPC) - Coursera, 2026

TECHNICAL SKILLS

Thin-Film & Process Development: CVD coatings, PVD-adjacent thin-film process concepts, surface preparation, polymer thin films, process windows, DOE, SPC, scale-up specifications
Characterization & Reliability: FT-IR, UV-Vis-NIR, ellipsometry, QCM-D, TGA, DSC, NMR, GPC/SEC, MS-informed analysis, failure-mode analysis, root-cause investigations
Manufacturing / Quality Mindset: Defect reduction logic, reproducibility studies, SOPs, technical design-review documentation, instrument uptime, data integrity
Data & Communication: Excel, Python/basic, JMP/basic, technical reports, presentations, publication-quality writing

CONFERENCE PRESENTATIONS

Modular Design and Electrochemical Properties of Xanthene-Based Electrochromic Materials, ACS Fall National Meeting, Denver, CO, August 2024.
Electrochemical and Spectroscopic Properties of Substituted Rhodamine Derivatives, Gerischer-Lewerenz Electrochemistry Symposium, Fort Collins, CO, August 2024.
Decoupling Redox and Color for High-Contrast Electrochromics, Excited State Processes Conference, Santa Fe, NM, June 2023.
Electrochromism: Decoupling Color and Redox in Rhodamine-Based Systems, Rocky Mountain Solid State Chemistry Workshop, Boulder, CO, January 2023.

HONORS & AWARDS

Plastic Sustainability Innovation in Material Award | INSPIRE Scholarship (Top 1%, India, 2015) | 97.12 Percentile - IIT JEE Mains (2015) | All India Rank 144 - NEST (2014)
