PROFESSIONAL SUMMARY

PhD chemist/materials scientist with deep analytical characterization, stability/degradation analysis, spectroscopy, mass-spectrometry exposure, and DOE-guided process-development experience. Builds reproducible methods, technical reports, and structure-property datasets that support analytical strategy, troubleshooting, and cross-functional development decisions.

CORE COMPETENCIES

Analytical Method Development

Chromatography & MS Exposure

IR/Raman/Spectroscopy

Particle & Solid-State Characterization

Stability / Degradation Analysis

DOE/SPC

Technical Reports

Cross-Functional Development

WORK EXPERIENCE

University of Colorado Boulder

July 2025 - Present

Postdoctoral Researcher

- Lead DOE-guided process-development experiments for bio-based polymer systems, defining analytical readouts, process windows, reproducibility criteria, and SOP-ready specifications.
- Use spectroscopy, FT-IR, thermal analysis, and statistical process-control concepts to connect process parameters with material quality, stability, and method repeatability.
- Translate experimental results into technical reports, troubleshooting recommendations, and documented methods for repeatable cross-functional execution.

University of Colorado Boulder

July 2021 - July 2025

Graduate Researcher

- Designed and characterized 15+ organic electrochromic material variants using UV-Vis-NIR, FT-IR, cyclic voltammetry, spectroelectrochemistry, NMR, GPC, TGA, DSC, and mass-spectrometry-informed analysis.
- Mapped structure-property-stability relationships, degradation pathways, and performance failure modes to guide molecular design and analytical interpretation.
- Built rigorous experimental documentation and datasets supporting method comparison, reproducibility assessment, and root-cause analysis.

Georgia Institute of Technology

Aug 2019 - July 2021

Graduate Researcher

- Co-led AFOSR-funded molecular thin-film process development, linking CVD/surface preparation with morphology, interfaces, optical performance, and reproducible process controls.
- Prepared technical updates and data packages connecting processing conditions with material performance for multidisciplinary research stakeholders.

ETH Zurich

May 2017 - July 2017

Research Assistant

- Optimized polymer thin-film deposition using DOE strategies and in-situ QCM-D process monitoring, characterizing film-growth kinetics to improve coating reproducibility.

University of Colorado Boulder

2021 - 2025

Laboratory Operations Manager

- Managed operations for a 15-member process-development laboratory, implementing equipment tracking, calibration routines, SOPs, and safety protocols that improved instrument uptime by 30%.
- Trained researchers on instrument workflows, experimental documentation, and safe handling while coordinating multiple concurrent materials-development projects.

Georgia Tech

2019-2021

Teaching Assistant, Organic Chemistry I & Lab

- Mentored 120+ undergraduates; developed supplemental materials improving exam performance by 15%.

KEY PROJECTS

Analytical Stability and Degradation Study

Chemistry of Materials 2025

Identified degradation, redox-instability, and performance failure modes across functional material variants using orthogonal analytical characterization.

UV-Vis-NIR, FT-IR, CV, TGA/DSC, NMR, GPC, MS-informed analysis

DOE-Guided Process and Method Documentation

Current

Defined process windows, analytical readouts, reproducibility criteria, and SOP-ready specifications for scalable polymer systems.

DOE, SPC, FT-IR, thermal analysis, technical reports

Thin-Film Coating Process Development

AFOSR Funded

Connected CVD and surface-preparation variables to coating morphology, interfaces, and device-level material performance.

CVD, QCM-D, spectroscopy, surface preparation

EDUCATION

Ph.D. in Chemistry - University of Colorado Boulder

2025

Dissertation: Modular Design and Electrochemical Properties of Xanthene-Based Electrochromic Materials

Advisor: Prof. Seth Marder

(Transferred from Georgia Institute of Technology)

B.S. (Research), Major: Chemistry; Minor: Materials Science - Indian Institute of Science (IISc)

2019

INSPIRE Scholarship for Higher Education (Top 1% nationally)

CERTIFICATIONS

Statistical Process Control (SPC) - Coursera, 2026

TECHNICAL SKILLS

Analytical Methods: UV-Vis-NIR, FT-IR, Raman-adjacent spectroscopy, cyclic voltammetry, spectroelectrochemistry, TGA, DSC, NMR, GPC, GC-MS/LC-MS exposure, QCM-D

Development & Validation Mindset: DOE, SPC, method documentation, reproducibility studies, troubleshooting, process windows, SOPs, analytical validation transferability

Materials & Chemistry: Organic/organometallic synthesis, polymer systems, thin films, coatings, stability/degradation analysis, impurity-control mindset

Data & Communication: Technical reports, data visualization, cross-functional presentations, root-cause analysis, Excel, Python/basic data analysis, JMP/basic

JOURNAL PUBLICATIONS

CONFERENCE PRESENTATIONS

Modular Design and Electrochemical Properties of Xanthene-Based Electrochromic Materials, ACS Fall National Meeting, Denver, CO, August 2024.

Electrochemical and Spectroscopic Properties of Substituted Rhodamine Derivatives, Gerischer-Lewerenz Electrochemistry Symposium, Fort Collins, CO, August 2024.

Decoupling Redox and Color for High-Contrast Electrochromics, Excited State Processes Conference, Santa Fe, NM, June 2023.

Electrochromism: Decoupling Color and Redox in Rhodamine-Based Systems, Rocky Mountain Solid State Chemistry Workshop, Boulder, CO, January 2023.

HONORS & AWARDS

Plastic Sustainability Innovation in Material Award | INSPIRE Scholarship (Top 1%, India, 2015) | 97.12 Percentile - IIT JEE Mains (2015) | All India Rank 144 - NEST (2014)
