PROFESSIONAL SUMMARY

PhD Chemist with 6+ years of experience in analytical development, method optimization, and materials characterization across process-development and advanced-material programs. Strong background in HPLC/LC-MS-adjacent workflows, spectroscopy, thermal analysis, DOE/SPC, and technical documentation for cross-functional CMC teams.

CORE COMPETENCIES

Analytical Development | Method Development & Optimization | Method Transfer | Release & Stability Support | HPLC / UHPLC / LC-MS-adjacent Workflows | Dissolution / KF / Thermal Analysis | DOE / SPC | Technical Documentation

WORK EXPERIENCE

University of Colorado Boulder
July 2025 - Present

Postdoctoral Researcher

- Leading DOE-guided process development for bio-based polymer systems, defining critical parameters, improving reproducibility, and establishing scale-up-ready process specifications.
- Developing characterization workflows and technical documentation that support stability-sensitive decision making and cross-functional development planning.

University of Colorado Boulder
July 2021 - July 2025

Graduate Researcher

- Built multi-technique analytical workflows using FT-IR, UV-Vis-NIR, cyclic voltammetry, NMR, TGA, and DSC to characterize 15+ organic and organometallic systems and interpret performance-limiting mechanisms.
- Generated high-quality datasets, troubleshooting plans, and technical conclusions that informed iterative materials and process decisions.

Georgia Institute of Technology
Aug 2019 - July 2021

Graduate Researcher

- Co-led AFOSR-funded thin-film process development, building reproducible deposition and characterization workflows for high-performance molecular coatings in a multidisciplinary setting.

ETH Zurich
May 2017 - July 2017

Research Assistant

- Developed CVD-based polymer thin-film deposition processes using DOE and in-situ QCM-D monitoring to improve process control and reproducibility.

University of Colorado Boulder
2021 - 2025

Laboratory Operations Manager

- Managed laboratory operations for a 15-member research group, improved instrument uptime by 30%, and wrote SOP-style documentation to support reliable experimental execution.

Georgia Institute of Technology
2019 - 2021

Teaching Assistant, Organic Chemistry I & Lab

- Mentored 120+ undergraduates and developed supplemental materials that improved exam performance by 15%, strengthening technical training and communication skills.

Georgia Tech 2019-2021

Teaching Assistant, Organic Chemistry I & Lab

- Mentored 120+ undergraduates; developed supplemental materials improving exam performance by 15%.

KEY PROJECTS

Bio-Based Polymer Scale-Up Process Current

Running DOE-guided process optimization and characterization studies to define reproducible operating windows and quality-relevant specifications for polymer systems moving toward scale-up.

DOE, process development, characterization, technical documentation

Electrochromic Material Reliability Study Chemistry of Materials 2025

Built stability and failure-analysis workflows for electrochromic materials, using multi-technique characterization to connect degradation behavior with design and processing choices.

FT-IR, UV-Vis-NIR, cyclic voltammetry, TGA, DSC, root-cause analysis

AFOSR Defense Thin-Film Coatings DoD Funded

Supported thin-film process development and reproducible characterization for defense-oriented coatings programs in a cross-functional environment with demanding technical timelines.

Thin films, process development, characterization, cross-functional execution

EDUCATION

Ph.D. in Chemistry - University of Colorado Boulder 2025

Dissertation: Modular Design and Electrochemical Properties of Xanthene-Based Electrochromic Materials
Advisor: Prof. Seth Marder
(Transferred from Georgia Institute of Technology)

B.S. (Research), Major: Chemistry; Minor: Materials Science - Indian Institute of Science (IISc) 2019

INSPIRE Scholarship for Higher Education (Top 1% nationally)

CERTIFICATIONS

Statistical Process Control (SPC) - Coursera, 2026

TECHNICAL SKILLS

Analytical Chemistry: FT-IR, UV-Vis-NIR, LC-MS, GC-MS, NMR, HPLC-adjacent workflows, GPC, QCM-D, ellipsometry, spectroelectrochemistry
CMC / QC Support: Method development, method transfer, stability-oriented testing, technical documentation, SOP-minded lab operations, data interpretation
Statistical Analysis: DOE, Statistical Process Control (SPC, Coursera 2026), JMP (basic), Python (basic), Excel (advanced), data visualization
Materials Expertise: Polymers, thin films, organic and organometallic materials, structure-property-processing relationships, degradation analysis
Project Management: Cross-functional execution, multi-project prioritization, stakeholder communication, laboratory coordination

CONFERENCE PRESENTATIONS

Modular Design and Electrochemical Properties of Xanthene-Based Electrochromic Materials, ACS Fall National Meeting, Denver, CO, August 2024.
Electrochemical and Spectroscopic Properties of Substituted Rhodamine Derivatives, Gerischer-Lewerenz Electrochemistry Symposium, Fort Collins, CO, August 2024.
Decoupling Redox and Color for High-Contrast Electrochromics, Excited State Processes Conference, Santa Fe, NM, June 2023.
Electrochromism: Decoupling Color and Redox in Rhodamine-Based Systems, Rocky Mountain Solid State Chemistry Workshop, Boulder, CO, January 2023.

HONORS & AWARDS

Plastic Sustainability Innovation in Material Award | INSPIRE Scholarship (Top 1%, India, 2015) | 97.12 Percentile - IIT JEE Mains (2015) | All India Rank 144 - NEST (2014)
